

Kitchen Residency Autumn 2025 - Moments of Connection

At Coreset, we believe art has the power to change lives, change the world and change the future for us all. We have created a unique and inspiring place for everyone to explore their creativity and learn from professionals. We are committed to helping people discover their artistic potential.

In Autumn 2025 we want to focus on the 'moments of connection' throughout our lives and the influence they have on how we see the world.

For this our Kitchen Residency we aim to encourage applicants that wish to collaborate with local communities, to immerse themselves here whilst they create a research-based project. We are seeking applications that intersect community engagement with food and artistic practices.

We are looking for individuals or collectives, preferably from diverse career and disciplinary backgrounds, who are interested in community centered creative research – potentially covering some of these issues sensory preferences, explorations of textures, flavours, and presentation styles, anxieties related to food, new/sustainable, and flexible ways of eating responding to climate change and pollution, regenerative approaches to feeding– with a specific focus on Newark.

What we are offering: A kitchen set up for research, to make work and experiment. Our team and resident artists are established professionals who will support you during your residency. We will be able to help you work towards your goals.

Please send via email to info@coreset.org with 'Kitchen Residency Application' in the subject heading on or before 31 July 2025.
